Do you want or need to  
**communicate in a language**  
you do not know?

**YOU NEED**  
**INTERPRETING SERVICES!**  
FIND OUT HOW WE CAN HELP.

## Why **interpret**

“ At the international level, if there is no interpreting, there couldn't be summits or meetings that allow heads of state or heads of government to come together to make very significant decisions. There would be no discussion on human rights or international trades. **Interpreters are the people who allow those kinds of conversations to take place.**

Dr. Andrew Clifford  
Coordinator  
Master of Conference Interpreting  
York University, Toronto, Canada

## Deliver your **intended message**

Whether it is organising international conferences, business meetings or transatlantic conference calls, **it is crucial that all parties can transgress language barriers and comprehend the messages as intended.**

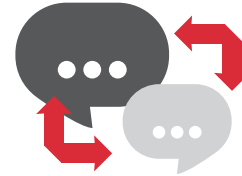

## “Why you need interpreting services

- When you wish to communicate in a language that you do not know
- When you need to send the same message to different groups of your target audience
- When you want to have an accurate understanding of the message from your overseas counterpart or business partners

## Types of interpreting services

- **Simultaneous Interpreting**

Message is conveyed almost at the same time as the speaker speaks

- **Consecutive Interpreting**

Message is conveyed after the speaker speaks, usually at the end of a complete thought

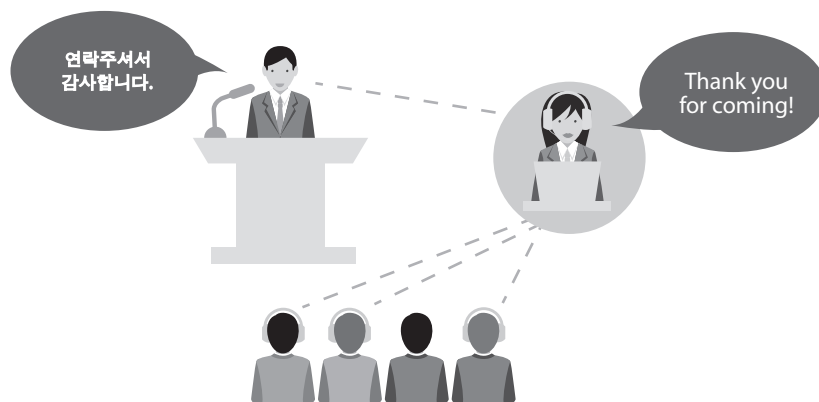

- **Accompanying Interpreting**

Message is conveyed sentence by sentence as the speaker speaks

Our team of Account Managers and Interpreters stands committed to one ultimate goal: Fostering better communications between different language speakers and conveying your message **EXACTLY** the way you intend it to be.

# Simultaneous Interpreting

As little to no delay between the speaker's speech and interpretation is permitted, simultaneous interpreters are often required to work in a team of two, taking turns to work every 15 minutes or so, for optimal performance.

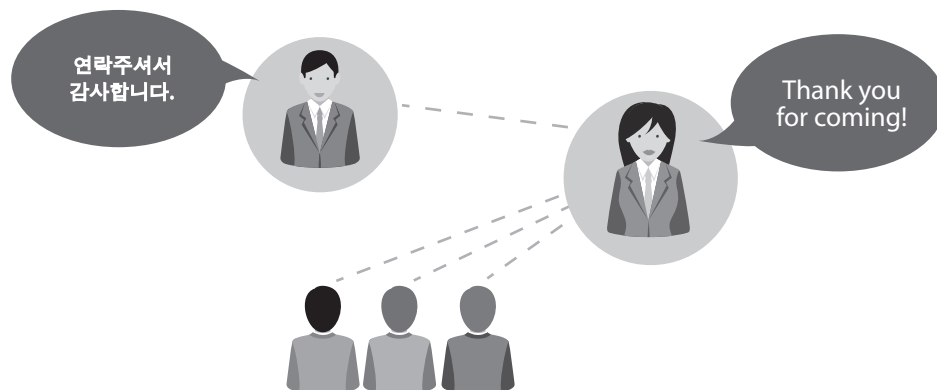

The facilitation of simultaneous interpreting requires professional simultaneous interpreting equipment, which include microphones, transmitters, receivers and interpreting booths.

This method is frequently used to cater for large scale Conferences, Summits, Board Meetings, Focus Group and, etc.

## Consecutive Interpreting

The interpreter has to listen to the discourse first and then interpret it into the target language after the speaker has finished speaking. The interpreter may take notes and record ideas while the speaker is talking to ensure that the message is conveyed without any loss of details.

This method is more appropriate for smaller scale events such as business meetings, discussions, site visits etc. In the case of a bigger group, the use of interpreting equipment is recommended.
